#### **Narrative Report**

Operational guidance for Fire and Rescue Authorities in Wales is detailed in the Fire and Rescue National Framework which has been produced by Welsh Government. The National Framework seeks to expand the role of Fire and Rescue Authorities in Wales in relation to prevention, education and engaging with the communities they serve whilst ensuring that their reactive firefighting capability is not compromised.

Mid and West Wales Fire and Rescue Authority produces annual action plans for managing down risks and improving services with an increasing emphasis on prevention and education. The Service is actively engaged in working with the communities it serves, an example of which is carrying out Home Safety checks. The Authority works in partnership with other emergency services, for example, the Welsh Ambulance Service, Dyfed Powys Police and South Wales Police are located at several of our properties, also the Welsh Ambulance Service through the Co-Responder scheme. Other schemes include our participation in the Young Firefighters' Association operated by off duty firefighters with branches across Mid and West Wales; the Phoenix project which has proved very successful with youth groups in the area; as well as participating in the new Public Services Boards formed under the Wellbeing of Future Generations Act.

The Authority's Statement of Accounts is a publication required by law; the prime purpose of which is to give clear information about the financial position and the financial performance of Mid and West Wales Fire and Rescue Authority for the financial year 2016/17.

The statements and their purposes are as follows:

#### Statement of Responsibilities for the Statement of Accounts

This sets out the respective responsibilities of the Authority and its officers for the preparation and approval of the Statement of Accounts.

#### **Comprehensive Income and Expenditure Statement (CIES)**

This statement shows the accounting cost in the year of providing services in accordance with generally accepted accounting practices, rather than the amount to be funded from taxation. Authorities raise taxation to cover expenditure in accordance with regulations; this may be different from the accounting cost. The taxation position is shown in both Expenditure and Funding Analysis and the Movement in Reserves Statement.

Fire and Rescue Authorities are considered to be "one service" entities and the "provision of Fire Services" is presented as one-line in the CIES.

#### **Movement in Reserves Statement (MiRS)**

This MiRS shows the movement in the year on the different reserves held by the Authority, analysed into 'usable reserves' (i.e. those that can be applied to fund expenditure or reduce local taxation) and other reserves. The (Surplus) or Deficit on the Provision of Services line shows the true economic cost of providing the Authority's services, more details of which are shown in the Comprehensive Income and Expenditure Statement. This is different from the statutory amounts required to be charged to the General Fund Balance, and the Increase / Decrease before Transfers to Earmarked Reserves line shows the statutory General Fund Balance before any discretionary transfers to or from earmarked reserves are undertaken by the Fire and Rescue Authority.

#### **Balance Sheet**

The Balance Sheet shows the value as at the Balance Sheet date of the assets and liabilities recognised by the Authority. The net assets of the Authority (assets less liabilities) are matched by the reserves held by the Authority. Reserves are reported in two categories. The first category of reserves are usable reserves, i.e. those reserves that the Authority may use to provide services, subject to the need to maintain a prudent level of reserves and any statutory limitations on their use (for example the Capital Receipts Reserve that may only be used to fund capital expenditure or repay debt). The second category of reserves includes reserves that hold unrealised gains and losses (for example the Revaluation Reserve), where amounts would only become available to provide services if the assets are sold; and reserves that hold timing differences shown in the Movement in Reserves Statement line 'Adjustments between accounting basis and funding basis under regulations'.

#### **Cash Flow Statement (CFS)**

The Cash Flow Statement shows the changes in cash and cash equivalents of the Authority during the reporting period. The statement shows how the Authority generates and uses cash and cash equivalents by classifying cash flows as operating, investing and financing activities. The amount of net cash flows arising from operating activities is a key indicator of the extent to which the operations of the Authority are funded by way of taxation and grant income or from the recipients of services provided by the Authority. Investing activities represent the extent to which cash outflows have been made for resources which are intended to contribute to the Authority's future service delivery. Cash flows arising from financing activities are useful in predicting claims on future cash flows by providers of capital (i.e. borrowing) to the Authority.

#### **Firefighters Pension Fund Account**

This shows the financial position of the Firefighters pension fund account, indicating whether the Authority owes, or is owed money by the Welsh Government to balance the account, together with details of its net assets.

#### **Expenditure and Funding Analysis (EFA)**

Following the "Telling the Story" review of the presentation of local authority financial statements, the 2016/17 Code changed the segmental reporting arrangements for the CIES and introduced the EFA.

The new EFA brings together Authority performance reported on the basis of expenditure measured under proper accounting practices with statutorily defined charges to the General Fund.

Both the CIES and EFA include a segmental analysis which requires Authorities to report performance on the basis of how they are structured and how they operate, monitor and manage financial performance. Therefore, Authorities are no longer required to report the cost of individual services in their CIES.

#### **Notes to the Accounting Statements**

The notes present information about the basis of preparation of the financial statements and the specific accounting policies used. They disclose information not presented elsewhere in the financial statements but is relevant to an understanding of them. The notes to the accounting statements contain for the first time this year the EFA.

#### **Annual Governance Statement**

This statement provides a continuous review of the effectiveness of the Authority's governance framework including the system of internal control and risk management systems, to give assurance on their effectiveness and/or to produce a management action plan to address identified weaknesses.

The Annual Governance Statement accompanies the Statement of Accounts but is not part of the Statement.

#### **Summary of the Financial Year**

The net revenue expenditure for the year was £43.196m, the contributions received from Unitary Authorities totalled £44.205m. During the year an adjustment for previous years' Minimum Revenue Provision over charge of £648k was appropriated to an Earmarked Reserve, resulting in a surplus of £361k. Outturn is based on actuals at the time of preparing the accounts. The surplus is transferred to the General Fund Balance. This transfer can be seen in the Movement in Reserves Statement and within the Usable Reserves in note 9.

Revenue and Capital Outturn for the year compared to budget is detailed in the following table:

Outturn for the year 2016/17	Budget £000	Actual £000	Variance £000
Revenue			
Expenditure including grants	48,865	47,712	(1,153)
Income including grants	(4,411)	(4,516)	(105)
Net Expenditure including grants	44,454	43,196	(1,258)
Unitary Authority contributions	(44,204)	(44,205)	(1)
Transfer to/(from) Reserves	(250)	648	898
(Surplus)/Deficit	0	(361)	(361)
Capital including b/fwd slippage	6,432	3,997	(2,435)

The Authority incurs revenue spending on items, which are generally consumed within the year, and this is financed by contributions from the six constituent local authorities in proportion to population. For 2016/17, the proportions were as follows:

Constituent Local Authorities	Values	Proportion
	£000	%
Carmarthenshire County Council	9,172	20.7
Ceredigion County Council	3,696	8.4
Neath and Port Talbot County Borough Council	6,851	15.5
Pembrokeshire County Council	6,036	13.7
Powys County Council	6,537	14.8
City and County of Swansea Council	11,913	26.9
Total	44,205	100.0

#### **Revenue Sources of Funding**

The Authority receives revenue from the following sources:

2015/16		2016/17
£000		£000
2,668	Revenue Grants	2,874
27	Interest	35
1,416	Fees & Charges/Reimbursements	1,607
4,111	Sub Total	4,516
43,769	Unitary Authority Contributions	44,205
47,880	Total Revenue Funding	48,721

#### **Capital Expenditure**

Total capital expenditure in the year amounted to £3.997m.

	<b>Estimate 2016/17</b>	Actual 2016/17	Estimate <b>2017/18</b>
	£000	£000	£000
Property – Refurbishments, adaptations, new buildings	2,561	1,289	735
Vehicles, Plant	3,610	2,426	4,388
Assets under Construction	0	0	0
Intangible Assets	261	282	297
Total Capital Expenditure	6,432	3,997	5,420
Financed by:			
Capital Grants & Contributions	0	0	385
Capital Donations	0	52	0
Capital Receipts	0	35	0
Earmarked Reserves	850	782	297
Finance Lease	2,948	0	2,306
Borrowing	2,634	3,128	2,432
Total Financing	6,432	3,997	5,420

#### **Capital Borrowing**

The Prudential Code allows the Authority to determine its own borrowing limits subject to the Responsible Financial Officer deeming it to be prudent, sustainable and affordable. All loans are from the Public Works Loan Board (PWLB) except for two Invest to Save loans from Welsh Government. There were no new external loans taken out in the year in respect of the capital funding requirement. The total principal outstanding as at 31 March 2017 is £16.911m.

#### **Pension liability**

In 2016/17, eight members of staff retired. The net cost of the Firefighters Pension Scheme to the revenue budget continues to grow, and the liability in terms of future pension commitments has increased due to adjustments made by the Actuaries to their assumptions. The actuarially assessed liability as at 31 March 2017 was £461.88m for the Firefighters Pension Scheme and £12.89m for the Local Government Pension Scheme.

Under International Accounting Standard 19 (Employee Benefits) the Authority is required to provide details of assets and future liabilities for pensions payable to employees, both past and present. This is outlined in greater detail in the disclosures to the accounts.

#### **Reserve Accounting**

At the end of the financial year, the Statement of Accounts shows financial reserves carried forward into 2017/18. This is consistent with the accounting treatment of previous years, with the maintenance and utilisation of reserves forming a cornerstone of corporate financial stability and operational service planning in the short and medium term.

#### **Capital Financing Costs**

The charge made to the service revenue accounts to reflect the cost of non-current assets used in the provision of services was £2.718m. This is a notional charge for depreciation and amortisation, and an adjustment is made to the year-end balance so the contributions required to fund the service are not affected. The actual cost to the service for financing capital is £879k for loan and finance lease interest, £1.499m Minimum Revenue Provision and £782k revenue contribution.

During the year three finance lease agreements with break clauses were renegotiated resulting in an interest rate credit of £331k. This transaction has been credited to the Financing Expenditure in the CIES.

#### **Impact of the Current Economic Climate**

The national economic downturn together with the outcomes of the Comprehensive Spending Review, gave an indication of the level of cuts to public services expected in the coming years. However, the referendum result to leave the European Union makes the level of government spending and future settlements uncertain.

The Authority's Annual Improvement Plan outlines various projects to review structures and processes in place throughout the organisation to make the necessary reductions for future years. The financial implications of these were clearly reflected in the Medium Term Financial Plan. Both the Annual Improvement Plan and the Medium Term Financial Plan are available on the Mid and West Wales Fire and Rescue Authority website.

#### **Additional Information**

Additional information about these accounts is available from the S151 Officer to the Authority and the Head of Finance. Interested members of the public also have a statutory right to inspect the accounts before the audit is completed; availability of the accounts for inspection is advertised on the Mid and West Wales Fire and Rescue Authority website.

#### **Acknowledgements**

Finally, I wish to thank all Finance staff within the Resources Directorate, and their colleagues throughout the Authority, who have worked on the preparation of these statements. I also wish to thank the Chief Fire Officer and Directors for their assistance and co-operation throughout this process.

The maintenance and integrity of Mid and West Wales Fire and Rescue Authority's website is the responsibility of the Authority; the work carried out by auditors does not involve consideration of these matters and accordingly auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the website.

Chris Moore FCCA, S151 Officer 4<sup>th</sup> February 2019

#### STATEMENT OF RESPONSIBILITIES

#### The Authority's Responsibilities

The Authority is required:

- to make arrangements for the proper administration of its financial affairs and to secure that one of its officers has the responsibility for the administration of those affairs. In this Authority, that officer is the Chief Financial Officer,
- to manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets.
- to approve the Statement of Accounts.

#### The Chief Financial Officer's Responsibilities

The Chief Financial Officer is responsible for the preparation of the Authority's Statement of Accounts, including the Pension Fund Accounts in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom ("the Code").

In preparing this statement of accounts, the Chief Financial Officer has:

- selected suitable accounting policies and then applied them consistently;
- made judgements and estimates that were reasonable and prudent;
- complied with the Local Authority Code.

The Chief Financial Officer has also:

- kept proper accounting records, which were up to date;
- taken reasonable steps for the prevention and detection of fraud and other irregularities.

	CERTIFICATE OF THE CHIEF FINANCIAL OFFICER
•	the accounts provide a true and fair view of the financial position of the Authority March 2017 and its income and expenditure for the year then ended.
Signature:	Chief Financial Officer
Dated:	

# Audit report of the Auditor General to the Mid and West Wales Fire and Rescue Authority

#### Report on the audit of financial statements

#### Opinion

I have audited the financial statements of

- the Mid and West Wales Fire & Rescue Authority; and
- the Fire Fighters' Pension Fund Account.

for the year ended 31st March 2017 under the Public Audit (Wales) Act 2004.

Mid and West Wales Fire & Rescue Authority's financial statements comprise the Movement in Reserves Statement, the Comprehensive Income and Expenditure Statement, the Balance Sheet, the Cash Flow Statement, and the related notes, including a summary of significant accounting policies.

The Fire Fighters' Pension Fund's accounting statements comprise the Fund Account and the Net Assets Statement.

The financial reporting framework that has been applied in their preparation is applicable law and the Code of Practice on Local Authority Accounting in the United Kingdom 2017 based on International Financial Reporting Standards (IFRSs).

As I stated in my report dated 11 December 2018, in my opinion the financial statements:

- give a true and fair view of the financial position of the Mid and West Wales Fire & Rescue
  Authority and the Firefighters' Pension Fund as at 31<sup>st</sup> March 2017 and of its income and
  expenditure for the year then ended; and
- have been properly prepared in accordance with legislative requirements and the Code of Practice on Local Authority Accounting in the United Kingdom 2017.

#### Basis for opinion

I conducted my audit in accordance with applicable law and International Standards on Auditing in the UK (ISAs (UK)). My responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of my report. I am independent of the Fire & Rescue Authority in accordance with the ethical requirements that are relevant to my audit of the financial statements in the UK including the Financial Reporting Ethical Standard, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

#### Conclusions relating to going concern

As I stated in my report dated 11 December 2018, I have nothing to report in respect of the following matters in relation to which the ISAs (UK) require me to report to you where:

- the use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the responsible financial officer has not disclosed in the financial statements any identified
  material uncertainties that may cast significant doubt about the Fire & Rescue Authority's
  ability to continue to adopt the going concern basis of accounting for a period of at least
  12 months from the date when the financial statements are authorised for issue.

#### Other information

The responsible financial officer is responsible for the other information in the annual report and accounts. The other information comprises the information included in the annual report other than the financial statements and my auditor's report thereon. My opinion on the financial

statements does not cover the other information and, except to the extent otherwise explicitly stated later in my report, I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by me in the course of performing the audit. If I become aware of any apparent material misstatements or inconsistencies I consider the implications for my report.

#### Report on other requirements

#### Opinion on other matters

As I stated in my report dated 11 December 2018, in my opinion, based on the work undertaken in the course of my audit:

- the information contained in the Narrative Report for the financial year for which the financial statements are prepared is consistent with the financial statements and the Narrative Report has been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2017;
- The information given in the Annual Governance Statement for the financial year for which the financial statements are prepared is consistent with the financial statements and the Annual Governance Statement has been prepared in accordance with guidance.

#### Matters on which I report by exception

In the light of the knowledge and understanding of the Fire & Rescue Authority and its environment obtained in the course of the audit, as I stated in my report dated 11 December 2018, I have not identified material misstatements in the Narrative Report or the Governance Statement.

I have nothing to report in respect of the following matters, which I report to you, if, in my opinion:

- adequate accounting records have not been kept;
- the financial statements are not in agreement with the accounting records and returns; or
- I have not received all the information and explanations I require for my audit.

#### Certificate of completion of audit

My report dated 11 December 2018 contained an audit opinion on the 2016-2017 accounts and explained that the audit could not be formally concluded until I completed my consideration of matters relating to the Fire Fighters' Pension Fund.

This work has now been completed and the audit issues resolved.

I certify that I have completed the audit of the accounts in accordance with the requirements of the Public Audit (Wales) Act 2004 and the Code of Audit Practice issued by the Auditor General for Wales.

#### Responsibilities

#### Responsibilities of the responsible financial officer for the financial statements

As explained more fully in the Statement of Responsibilities for the Statement of Accounts set out on page 8, the responsible financial officer is responsible for the preparation of the statement of accounts, which give a true and fair view, and for such internal control as the responsible financial officer determines is necessary to enable the preparation of statements of accounts that are free from material misstatement, whether due to fraud or error.

In preparing the statement of accounts, the responsible financial officer is responsible for assessing the Fire & Rescue Authority's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless deemed inappropriate.

#### Auditor's responsibilities for the audit of the financial statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. A further description of the auditor's responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website <a href="https://www.frc.org.uk/auditorsresponsibilities">www.frc.org.uk/auditorsresponsibilities</a>. This description forms part of my auditor's report.

Anthony J Barrett For and on behalf of the Auditor General for Wales 5 February 2019 24 Cathedral Road Cardiff CF11 9LJ

## **Expenditure and Funding Analysis (EFA)**

The Expenditure and Funding Analysis shows how annual expenditure is used and funded from resources (contributions from constituent authorities, government grants, other income etc.) by the Authority in comparison with those resources consumed or earned by the Authority in accordance with generally accepted accounting practices. Income and expenditure accounted for under generally accepted accounting practices is presented more fully in the Comprehensive Income and Expenditure Statement.

The EFA is a note to the financial statements not a primary statement. However, it has been positioned with the primary statements to aid the readers understanding.

(20,385)	Adjustment to surplus or deficit on the provision of services for noncash movements	(13,601)
11	Adjustment for items included in the net surplus or deficit on the provision of services that are investing or financing activities	35
(5,981)	Net cash (inflow)/outflow from operating activities	(3,275)
3,472	Net cash (inflow)/outflow from investing activities	3,972
(6,007)	Net cash (inflow)/outflow from financing activities	5,084
(8,516)	Net (increase) or decrease in cash and cash equivalents	5,781
1,826	Cash and cash equivalents at the beginning of the reporting period	10,342
10,342	Cash and cash equivalents at the end of the reporting period	4,561

<sup>\*</sup> Format of Cash Flow Statement amended requiring restatement of comparators.

A detailed breakdown of the Cash flow is provided in Notes 19 to 21

#### **Note 1 - Accounting Policies**

#### i. General Principles

The Statement of Accounts summarises the Authority's transactions for the 2016/17 financial year and its position at the year-end. The Authority is required to prepare an annual Statement of Accounts by the Accounts and Audit (Wales) Regulations 2014 in accordance with proper accounting practices. These practices under Section 21 of the 2003 Act primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2016/17, supported by International Financial Reporting Standards (IFRS) and statutory guidance issued under section 12 of the 2003 Act.

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

#### ii. Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from the sale of goods is recognised when the Authority transfers the significant risks and rewards of ownership to the purchaser and it is probable that economic benefits or service potential associated with the transaction will flow to the Authority.
- Revenue from the provision of services is recognised when the Authority can measure reliably the percentage of completion of the transaction and it is probable that economic benefits or service potential associated with the transaction will flow to the Authority.
- Supplies are recorded as expenditure when they are consumed where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

#### iii. Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are highly liquid investments that mature in no more than three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Authority's cash management.

#### iv. Prior Period Adjustments, Changes in Accounting Policies, Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the

current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Authority's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

#### v. Charges to Revenue for Non-current Assets

Services, support services and trading accounts are debited with the following amounts to record the cost of holding non-current assets during the year:

- depreciation attributable to the assets used by the relevant service
- revaluation and impairment losses on assets used by the Service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off
- amortisation of intangible assets attributable to the Service.

The Authority is not required to raise a levy to fund depreciation, revaluation and impairment losses or amortisation. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement equal to an amount calculated on a prudent basis determined by the Authority in accordance with statutory guidance. Depreciation, revaluation and impairment losses and amortisation are therefore replaced by the contribution in the General Fund Balance (Minimum Revenue Provision) by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

#### vi. Employee Benefits

#### - Benefits Payable During Employment

Short-term employee benefits are those due to be settled wholly within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Authority. An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday entitlements are charged to revenue in the financial year in which the holiday absence occurs.

#### - Termination Benefits

Termination benefits are amounts payable as a result of a decision by the Authority to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy in exchange for those benefits and are charged on an accruals basis to the appropriate service segment or, where applicable, to a corporate service segment at the earlier of when the Authority can no longer withdraw the offer of those benefits or when the Authority recognises costs for a restructuring. Where termination benefits involve the

enhancement of pensions, statutory provisions require the General Fund Balance to be charged with the amount payable by the Authority to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

#### - Post-employment Benefits

Employees of the Authority are members of two separate pension schemes: the Local Government Pensions Scheme, administered by Dyfed Pension Fund, Carmarthenshire County Council; and the Firefighter Pension Scheme, administered by Dyfed Pension Fund, Carmarthenshire County Council.

Both schemes provided defined benefits to members (retirement lump sums and pensions), earned as employees worked for the Authority. However, the Local Government Pension Scheme is funded through the ownership of assets, the Firefighter Pension Scheme is unfunded.

#### The Local Government Pension Scheme LGPS

The LGPS is accounted for as a defined benefits scheme:

- The liabilities of the Dyfed Pension Fund attributable to the Authority are included in the Balance Sheet on an actuarial basis using the projected unit method i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc, and projections of earnings for current employees.
- Liabilities are discounted to their value at current prices, using a discount rate of 2.6% (based on the indicative rate of return on high quality corporate bonds).
- The assets of Dyfed Pension Fund attributable to the Authority are included in the Balance Sheet at their fair value:
  - o quoted securities current bid price
  - o unquoted securities professional estimate
  - o unitised securities current bid price
  - o property market value

The change in the net pensions liability is analysed into the following components: Service cost comprising:

- Current service cost the increase in liabilities as a result of years of service earned this year allocated in the Comprehensive Income and Expenditure Statement to the services for which the employees worked.
- Past service cost the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years – debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement.
- Net interest on the net defined benefit liability (asset), i.e. net interest expense for the Authority the change during the period in the net defined benefit liability (asset) that arises from the passage of time charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement this is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability (asset) at the beginning of the

period – taking into account any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payments.

#### Remeasurements comprising:

- the return on plan assets excluding amounts included in net interest on the net defined benefit liability (asset) – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
- actuarial gains and losses changes in the net pensions liability that arise because events
  have not coincided with assumptions made at the last actuarial valuation or because the
  actuaries have updated their assumptions charged to the Pensions Reserve as Other
  Comprehensive Income and Expenditure.

Contributions paid to the Dyfed Pension Fund – cash paid as employer's contributions to the pension fund in settlement of liabilities; not accounted for as an expense.

#### The Firefighter Pension Scheme FFPS

The FFPS is accounted for as an unfunded defined benefits scheme, the scheme has no assets and no investment income:

- The liabilities of the Fund are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc, and projections of earnings for current employees.
- Liabilities are discounted to their value at current prices, using a discount rate of 2.7% (based on Government bond yields of appropriate duration plus an additional margin).

The change in the net pensions liability is analysed into the following components:

#### Service cost comprising:

- current service cost the increase in liabilities as a result of years of service earned this
  year allocated in the Comprehensive Income and Expenditure Statement to the services
  for which the employees worked.
- past service cost the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years – debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement.
- net interest on the net defined benefit liability, i.e. net interest expense for the Authority the change during the period in the net defined benefit liability that arises from the passage of time charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement this is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability at the beginning of the period taking into account any changes in the net defined benefit liability during the period as a result of contribution and benefit payments.

#### Remeasurements comprising:

actuarial gains and losses – changes in the net pensions liability that arise because
events have not coincided with assumptions made at the last actuarial valuation or
because the actuaries have updated their assumptions – charged to the Pensions
Reserve as Other Comprehensive Income and Expenditure.

Contributions paid to the Fund – cash paid as employer's contributions to the pension fund in settlement of liabilities; not accounted for as an expense.

In relation to retirement benefits, statutory provisions require the General Fund Balance to be charged with the amount payable by the Authority to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are transfers to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

#### **Discretionary Benefits**

The Authority also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the LGPS and FFPS.

#### vii. Events After the Reporting Period

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the end of the reporting period –
   the Statement of Accounts is adjusted to reflect such events.
- those that are indicative of conditions that arose after the reporting period the Statement
  of Accounts is not adjusted to reflect such events, but where a category of events would
  have a material effect, disclosure is made in the notes of the nature of the events and their
  estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

#### viii. Financial Instruments

#### **Financial Liabilities**

Financial liabilities are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and are carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

For most of the borrowings that the Authority has, this means that the amount presented in the Balance Sheet is the outstanding principal repayable (plus accrued interest); and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

#### **Financial Assets**

Financial assets are classified into two types:

- Loans and receivables assets that have fixed or determinable payments but are not quoted in an active market.
- Available-for-sale assets assets that have a quoted market price and/or do not have fixed or determinable payments.

#### **Loans and Receivables**

Loans and receivables are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Authority has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

Any gains and losses that arise on the derecognition of an asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

#### ix. Government Grants and Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Authority when there is reasonable assurance that:

- the Authority will comply with the conditions attached to the payments, and
- the grants or contributions will be received.

Amounts recognised as due to the Authority are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset in the form of the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-specific Grant Income and Expenditure (non-ringfenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

#### x. Intangible Assets

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Authority as a result of past events (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Authority.

Internally generated assets are capitalised where it is demonstrable that the project is technically feasible and is intended to be completed (with adequate resources being available) and the Authority will be able to generate future economic benefits or deliver service potential by being able to sell or use the asset. Expenditure is capitalised where it can be measured reliably as attributable to the asset and is restricted to that incurred during the development phase (research expenditure cannot be capitalised).

Intangible assets are measured initially at cost. Amounts are only revalued where the fair value of the assets held by the Authority can be determined by reference to an active market. In practice, no intangible asset held by the Authority meets this criterion, and they are therefore carried at amortised cost. The depreciable amount of an intangible asset is amortised over its useful life in the Comprehensive Income and Expenditure Statement over a range of 3 to 15 years.

#### xi. Inventories and Long-term Contracts

Inventories are included in the Balance Sheet at the lower of cost and net realisable value. The cost of inventories is assigned using the First in, First Out (FIFO) costing formula.

Long-term contracts are accounted for on the basis of charging the Surplus or Deficit on the Provision of Services with the value of works and services received under the contract during the financial year.

#### xii. Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

#### The Authority as Lessee

#### **Finance Leases**

Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the Authority are added to the carrying amount of the asset. Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred. Lease payments are apportioned between:

- a charge for the acquisition of the interest in the property, plant or equipment applied to write down the lease liability, and
- a finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

Property, plant and equipment recognised under finance leases is accounted for using the policies applied generally to such assets, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life (where ownership of the asset does not transfer to the Authority at the end of the lease period).

#### **Operating Leases**

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefitting from use of the leased property, plant or equipment. Charges are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a rent-free period at the commencement of the lease).

#### xiii. Property, Plant and Equipment

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as property, plant and equipment.

#### - Recognition

Expenditure on the acquisition, creation or enhancement of property, plant and equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Authority and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

The de-minimis level for capitalising assets, with a useful life exceeding 12 months, is £5,000.

#### - Measurement

Assets are initially measured at cost, comprising:

- the purchase price,
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management

The Authority does not capitalise borrowing costs incurred whilst assets are under construction. The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Authority). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Authority.

Donated assets are measured initially at fair value. The difference between fair value and any consideration paid is credited to the Taxation and Non-specific Grant Income and Expenditure line of the Comprehensive Income and Expenditure Statement, unless the donation has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement,

they are reversed out of the General Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Assets are then carried in the Balance Sheet using the following measurement bases:

- infrastructure depreciated historical cost
- assets under construction historical cost
- Authority offices current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV)
- surplus assets the current value measurement base is fair value, estimated at highest and best use from a market participant's perspective
- all other assets current value, determined as the amount that would be paid for the asset in its existing use (existing use value EUV).

Where there is no market-based evidence of current value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of current value.

Where non-property assets that have short useful lives or low values (or both), depreciated historical cost basis is used as a proxy for current value.

Assets included in the Balance Sheet at current value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their current value at the yearend, but as a minimum every five years. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains.

Where decreases in value are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

#### - Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist, and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line in the Comprehensive Income and Expenditure Statement, up to the amount of

the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

#### - Depreciation

Depreciation is provided for on all property, plant and equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain community assets) and assets that are not yet available for use (i.e. assets under construction).

Deprecation is calculated on the following bases:

- dwellings and other buildings straight-line allocation over the useful life of the property as estimated by the valuer (10-80 years)
- vehicles, plant, furniture and equipment straight-line allocation (3-15 years)
- infrastructure straight-line allocation (5-40 years)

Where an item of property, plant and equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

#### - Disposals and Non-Current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an asset held for sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any losses previously recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on assets held for sale.

If assets no longer meet the criteria to be classified as assets held for sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as held for sale, and their recoverable amount at the date of the decision not to sell. Assets that are to be abandoned or scrapped are not reclassified as assets held for sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether property, plant and equipment or assets held for sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for a disposal are categorised as capital receipts. The balance of receipts remains within the Capital Receipts Reserve and can then only be used for new capital investment or set aside to reduce the Authority's underlying need to borrow (the capital financing requirement). Receipts are appropriated to the Reserve from the General Fund

Balance in the Movement in Reserves Statement. Receipts under £10,000 and miscellaneous receipts not related to disposal of assets cannot be treated as capital items and shall be credited to the CIES.

#### xiv. Provisions, Contingent Liabilities and Contingent Assets

#### - Provisions

Provisions are made where an event has taken place that gives the Authority a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement when the Authority has an obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service. Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the Authority settles the obligation.

#### - Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Authority a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

#### - Contingent Assets

A contingent asset arises where an event has taken place that gives the Authority a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

#### xv. Reserves

The Authority sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by transferring amounts out of the General Fund Balance. These reserves are explained in the relevant notes to the Balance Sheet.

Certain reserves are kept to manage the accounting processes for non-current assets, financial instruments, local taxation, retirement and employee benefits and do not represent usable resources for the Authority.

#### xvi. Value Added Tax (VAT)

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs (HMRC). VAT receivable is excluded from income.

#### Note 2 - Accounting Standards Issued, Not Adopted

Authorities are required to disclose information relating to the probable impact of an accounting change that will be required by a new standard that has been issued but not yet adopted by the Code of Practice. The accounting changes introduced in the 2017/18 Code relate to an amendment to the reporting of pension fund scheme transaction costs, and an amendment to the reporting of investment concentration. Neither of these are expected to have a material impact on the Authority and will not require a restatement of this year's financial statements in 2017/18.

#### **Note 3 - Critical Judgements in Applying Accounting Policies**

In applying the accounting policies set out in the Accounting Policies, the Authority has had to make certain judgements about complex transactions or those involving uncertainty about future events. The critical judgements made in the Statement of Accounts are as follows:

There is a high degree of uncertainty about future levels of funding for local government.
However, the Authority has determined that this uncertainty is not yet sufficient to provide
an indication that the assets of the Authority might be impaired as a result of the need to
reduce levels of service provision.

# Note 4 - Assumptions Made about the Future and Other Major Sources of Estimation Uncertainty

The Statement of Accounts contains estimated figures that are based on assumptions made by the Authority about the future or that are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

Property, Plant and Equipment – Non-current Assets are depreciated over useful lives that are dependent on assumptions about the level of repairs and maintenance that will be incurred in relation to individual assets. The current economic climate makes it uncertain that the Authority will be able to sustain its current spending on repairs and maintenance, bringing into doubt the useful lives assigned to assets. If the useful life of the asset is reduced depreciation increases and the carrying amount of the asset falls.

Pensions liability - Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and, for the Local government pension scheme, the expected returns on pension fund assets. Consulting Actuaries are engaged to

provide the Authority with expert advice about the assumptions to be applied. Please refer to Note 30 for Pension liability sensitivity analysis.

#### Note 5 - Events After the Balance Sheet Date

The Statement of Accounts was authorised for issue by the Chief Financial Officer as per date noted on page 8. Events taking place after this date are not reflected in the financial statements or notes. Where events taking place before this date provided information about conditions existing at 31 March 2017, the figures in the financial statements and notes have been adjusted in all material respects to reflect the impact of this information.

There have been no material events after the Balance Sheet date.

Note 6 - Note to the Expenditure and Funding Analysis

	2016/17				
	Net Capital Statutory Adjustments	Net Pensions Statutory Adjustments	Other Differences	Total Adjustments	
	£000	£000	£000	£000	
Provision of Fire Services	2,942	(3,904)	3	(959)	
Net Cost of Services	2,942	(3,904)	3	(959)	
Other Income and Expenditure	(2,332)	13,809	0	11,477	
Difference between the Statutory Charge and the Surplus or Deficit in the Comprehensive Income and Expenditure Statement	610	9,905	3	10,518	

	2015/16				
	Net Capital Statutory Adjustments	Net Pensions Statutory Adjustments	Other Differences	Total Adjustments	
	£000	£000	£000	£000	
Provision of Fire Services	4,694	(2,729)	69	2,034	
Net Cost of Services	4,694	(2,729)	69	2,034	
Other Income and					
Expenditure	(2,245)	14,878	0	12,633	
Difference between the Statutory Charge and the Surplus or Deficit in the Comprehensive Income and Expenditure Statement	2,449	12,149	69	14,667	

**Net Capital Statutory Adjustments** – this column adds in depreciation and impairment and revaluation gains and losses in the services line, and for:

- Other operating expenditure adjusts for capital disposals with a transfer of income on disposal of assets and the amounts written off for those assets.
- Financing and investment income and expenditure the statutory charges for capital financing i.e. Minimum Revenue Provision and other revenue contributions are deducted from other income and expenditure as these are not chargeable under generally accepted accounting practices.
- Taxation and non-specific grant income and expenditure capital grants are adjusted for
  income not chargeable under generally accepted accounting practices. Revenue grants
  are adjusted from those receivable in the year to those receivable without conditions or for
  which conditions were satisfied throughout the year. The Taxation and Non-Specific Grant
  Income and Expenditure line is credited with capital grants receivable in the year without
  conditions or for which conditions were satisfied in the year.

**Net Pensions Statutory Adjustments** - Net change for the removal of pension contributions and the addition of IAS 19 Employee Benefits pension related expenditure and income:

- For Services this represents the removal of the employer pension contributions made by the Authority as allowed by statute and the replacement with current service costs and past service costs.
- For Financing and investment income and expenditure the net interest on the defined benefit liability is charged to the CIES.

**Other Differences** between amounts debited/credited to the Comprehensive Income and Expenditure Statement and amounts payable/receivable to be recognised under statute:

- For Financing and investment income and expenditure the other differences column recognises adjustments to the General Fund for the timing differences for premiums and discounts.
- The charge under Taxation and non-specific grant income and expenditure represents the
  difference between what is chargeable under statutory regulations that was projected to
  be received at the start of the year and the income recognised under generally accepted
  accounting practices in the Code. This is a timing difference as any difference will be
  brought forward in future Surpluses or Deficits on the Collection Fund.

# Note 8 - Adjustments between Accounting Basis and Funding Basis under Regulations

This note details the adjustments that are made to the total comprehensive income and expenditure recognised by the Authority in the year in accordance with proper accounting practice to arrive at the resources that are specified by statutory provisions as being available to the Authority to meet future capital and revenue expenditure. The following sets out a description of the reserves that the adjustments are made against.

- General Fund Balance The General Fund is the statutory fund into which all the receipts of an Authority are required to be paid and out of which all liabilities of the Authority are to be met, except to the extent that statutory rules might provide otherwise. These rules can also specify the financial year in which liabilities and payments should impact on the General Fund Balance, which is not necessarily in accordance with proper accounting practice. The General Fund Balance therefore summarises the resources that the Authority is statutorily empowered to spend on its services or on capital investment (or the deficit of resources that the Authority is required to recover) at the end of the financial year.
- Capital Receipts Reserve holds the proceeds from the disposal of land and other noncurrent assets, which are restricted by statute from being used other than to fund new capital expenditure or to be set aside to finance historical capital expenditure. The balance on the reserve shows the resources that have yet to be applied for these purposes at the the year end.

<sup>\*</sup> At the 31 March 2017 each Earmarked Reserve was reviewed for purpose and adequacy, and the number of Earmarked Reserves held by the by the Authority has been rationalised.

An overview of the purpose of the Usable Reserves held by the Authority is detailed in the following table:

Name	Purpose
General Fund Balance	Non-Earmarked Reserve maintained to cushion the impact of emergencies, to offset the impact of unforeseen events.
Levy Equalisation	Used to "smooth" the changes in the levy charged each year to the constituent Unitary Authorities.
Invest to Save	Maintained to provide resources to allow the Authority to invest in the transformation of its services and to realise future cost reductions/efficiencies.
Capital Fund	Maintained to provide additional resources for the capital programme, providing flexibility to the financing of capital investment.
Major Incidents	Funding set aside for one-off incidents outside routine service delivery activity. Replenished through base budget in future years to maintain the level required to manage major incidents.
Fundraising & Miscellaneous Ring-fenced	Surpluses generated by various schemes e.g. car salary sacrifice scheme and money raising events to be used for specific purposes.
Software & Communication	Maintained to provide resources to fund one-off ICT infrastructure investment, and future emergency services network.
Risk Management	Maintained to the meet the Authority's exposure to claims under its insurance arrangements; to provide flexibility to meet the volatility of the insurance market and to provide resources to take any measures to improve the Authority's risk exposure position.
Minimum Revenue Provision	Welsh Government are currently reviewing MRP guidance and it is deemed prudent to set up an Earmarked Reserve to protect the Authority from the impact of potential changes to guidance.
Capital Receipts	Holds proceeeds from the sale of assets and are available to finance capital expenditure in future years.

# \* Prior Year Adjustment

A review of the Asset Register by officers identified non-current assets which are no longer owned by the Authority due to disposal or scrappage. A validation exercise of all assets is completed on an annual basis but by omission a number of assets have been inadvertently missed during previous years. Assets which are disposed of or scrapped should be removed from the Asset Register and accounted for in the relevant year. However, it has not been possible to identify when these assets were disposed of or scrapped therefore a retrospective restatement is impracticable. Consequently, the assets identified have been removed from the asset register as at 1<sup>st</sup> April 2016 resulting in an adjustment to the opening Net Book Value of £62k (Gross Book Value £6,905k less Accumulated Depreciation £6,843k).

Movements to 31 March 2016	Land and Buildings	Vehicles, Plant, Furniture & Equipment	Infrastructure	Assets Under Construction	Total Property, Plant and Equipment

at 31 March 2015	56,022	8,294	241	130	64,687

# **Capital Commitments**

At 31 March 2017, the Authority had the following major commitment:

- £373k Multi-function Personal Protective Equipment
- £117k Operational Vehicles

#### Revaluations

The Authority revalues its Land and Buildings at least once every five years, the last valuation being carried out as at 1 April 2015.

Only one property was revalued in 2016/17, the newly constructed Aberystwyth Fire Station. The revaluation was carried out by a member of the Royal Institution of Chartered Surveyors employed by Carmarthenshire County Council. The revaluation was carried out in accordance with the methodologies and bases for estimation set out in the professional standards of the Royal Institution of Chartered Surveyors.

# **Non-operational Property, Plant and Equipment (Surplus Assets)**

The Authority does not have surplus assets.

# Note 13 - Intangible Assets

The Authority accounts for its software as intangible assets, to the extent that the software is not an integral part of a particular IT system and accounted for as part of the hardware item of property, plant and equipment. The intangible assets include both purchased licenses and internally generated software.

All software is given a finite useful life, based on assessments of the period that the software is expected to be of use to the Authority. The useful lives assigned to the major software suites used by the Authority is 10 years.

The movement on Intangible Asset balances during the year is as follows:

2015/16		2016/17
£000		£000
	Gross Book Value	
270	Opening Balance at 1 April	304
34	Additions	282

Creditors: Financial liabilities carried at contract amount			(4,785)	(4,066)

<sup>\*</sup> Restated for error in final version of 2015/16 Statement of Account disclosure note.

# Income, Expense, Gains and Losses

	_	5/16	2016/17		
	Financial Liabilities measured at amortised cost		Financial Liabilities measured at amortised cost	Financial Assets: Loans and receivables	
	£000	£000	£000	£000	
Interest expense	950	0	548	0	
Total expense in Surplus or Deficit on the Provision of Services	950	0	548	0	
Interest income	0	(27)	0	(35)	
Total income in Surplus or Deficit on the Provision of Services	0	(27)	0	(35)	
Net (gain)/loss for the year	950	(27)	548	(35)	

# Financial Instruments - Fair Value

Financial liabilities and financial assets represented by loans and receivables are carried on the Balance Sheet at amortised cost (in long-term assets/liabilities with accrued interest in current assets/liabilities). Their fair value can be assessed by calculating the present value of the cash flows that take place over the remaining life of the instruments, using the following assumptions:

- For loans from the Public Works Loans Board (PWLB) and other loans payable, borrowing from the PWLB have been applied to provide the fair value under PWLB debt redemption procedures;
- · No early repayment or impairment is recognised;
- Where an instrument has a maturity of less than 12 months or is a trade or other receivable the fair value is taken to be the carrying amount or the billed amount;
- The fair value of trade and other receivables is taken to be the invoiced or billed amount.

The fair values calculated are as follows:

	31 March 20	16	31 March	2017	
	Carrying Amount	Fair Value	Carrying Amount		
	£000	£000	£000	£000	
Long Term Creditors - PWLB	20,746	25,371	16,466	22,333	
Non-PWLB Debt	304	n/a	445	n/a	
Total	21,050	25,371	16,911	22,333	

The fair value is greater than the carrying amount because early repayment of PWLB debt will incur an early repayment premium, the fair value takes account of the early repayment premium. Loans are at level 2 in the Fair Value Hierarchy, that is they are valued at prices that are observable either directly or indirectly.

# Note 15 - Debtors

# **Revaluation Reserve**

The Revaluation Reserve contains the gains made by the Authority arising from increases in the value of its property, plant and equipment and intangible assets.

The balance is reduced when assets with accumulated gains are:

- revalued downwards or impaired and the gains are lost
- used in the provision of services and the gains are consumed through depreciation, or
- disposed of and the gains are realised.

The Reserve contains only revaluation gains accumulated since 1 April 2007, the date that the Reserve was created. Accumulated gains arising before that date are consolidated into the balance on the Capital Adjustment Account.

2015/16		2016/17
£000		£000
(20,960)	Balance 1 April	(16,078)

393	Difference between fair value depreciation and historical cost depreciation	393
0	Accumulated gains on assets sold or scrapped	0
393	Amount written off to the Capital Adjustment Account	393
(16,078)	Balance 31 March	(15,685)

# **Capital Adjustment Account**

The Capital Adjustment Account absorbs the timing differences arising from the different arrangements for accounting for the consumption of non-current assets and for financing the acquisition, construction or additions to those assets under statutory provisions. The Account is debited with the cost of acquisition, construction or subsequent costs as depreciation, impairment losses and amortisations are charged to the Comprehensive Income and Expenditure Statement (with reconciling postings from the Revaluation Reserve to convert current and fair value figures to a historical cost basis). The Account is credited with the amounts set aside by the Authority as finance for the costs of acquisition, construction and subsequent costs.

The Account contains accumulated gains and losses on Investment Properties and gains recognised on donated assets that have yet to be consumed by the Authority.

The Account also contains revaluation gains accumulated on property, plant and equipment before 1 April 2007, the date that the Revaluation Reserve was created to hold such gains.

(20,608)	Balance 31 March	(20,328)

# **Pension Reserve**

The Pensions Reserve absorbs the timing differences arising from the different arrangements for accounting for post-employment benefits and for funding benefits in accordance with statutory provisions. The Authority accounts for post-employment benefits in the Comprehensive Income and Expenditure Statement as the benefits are earned by employees accruing years of service, updating the liabilities recognised to reflect inflation, changing assumptions and investment returns on any resources set aside to meet the costs.

However, statutory arrangements require benefits earned to be financed as the Authority makes employer's contributions to pension funds or eventually pays any pensions for which it is directly responsible. The debit balance on the Pensions Reserve therefore shows a

substantial shortfall in the benefits earned by past and current employees and the resources the Authority has set aside to meet them. The statutory arrangements will ensure that funding will have been set aside by the time the benefits come to be paid.

2015/16 £000		2016/17 £000
452,557	Balance 1 April	391,976
(72,789)	Remeasurements of the net defined benefit (liability)/asset	72,890
27,238	Reversal of items relating to retirement benefits debited or credited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement	24,542
(15,090)	Employer's pensions contributions and direct payments to pensioners payable in the year	(14,637)
60	Other movements	(1)
391,976	Balance 31 March	474,770

# **Accumulated Absences Account**

The Accumulated Absences Account absorbs the differences that would otherwise arise on the General Fund Balance from accruing for compensated absences earned but not taken in the year, e.g. annual leave entitlement carried forward at 31 March. Statutory arrangements require that the impact on the General Fund Balance is neutralised by transfers to or from the Account.

<sup>\*</sup> Benefit in Kind relates to an allowance for a vehicle on the Service's leased car scheme. The calculation of Benefit in Kind was corrected in 2016/17.

<sup>\*\*</sup> Pay in lieu of notice and forms part of the Exit Packages disclosure.

#### **Notes**

- 1. Unlike the other Senior Officers, the Assistant Chief Officer (Director of Resources) 1 and Assistant Chief Officer (Director of Resources) 2 are required to purchase car fuel for business mileage and then claim back expenses.
- 2. Deputy Chief Fire Officer 2 left the Authority on 15th April 2015.
- 3. Temporary Deputy Chief Officer left the post on 30th April 2015.
- 4. The Chief Fire Officer left the Service from 18 July 2016 to 18 August 2016 on an employment abatement agreed by the Fire Authority.
- 5. Further to the Chief Fire Officer abatement, for the period 18 July to 18 August 2016 the Deputy Chief Fire Officer 1 received an honorarium for covering during this period.
- 6. Assistant Chief Officer (Director of Resources) 1 left the post on 31 December 2016 on a salary of £94,210. The exit package cost totalled £85,253, which consisted of payment in lieu of notice of £23,417 and pension actuarial strain £61,836. The post holder was the Authority's S151 Officer. With effect from 1st January 2017 a S151 Officer was appointed through an agency company, Penna PLC. The costs incurred for the 3 months to the end of the year were £38,025.
- 7. Assistant Chief Officer (Director of Resources) 2 was temporarily appointed 1<sup>st</sup> January 2017 following the departure of Assistant Chief Officer (Director of Resources) 1, on a salary of £93,710.

### Officer Remuneration

The Authority's other employees receiving more than £60,000 remuneration for the year (excluding employer's pension contributions) were paid the following amounts:

	Number of Employees		
	2015/16	2016/17	
£60,001 to £65,000	2	1	
£65,001 to £70,000	3	1	
£70,001 to £75,000	0	2	
£75,001 to £80,000	2	2	
Total	7	6	

In 2016/17 the ratio of the highest paid to the median full time equivalent salary of £29,640 is 4.77:1 (in 2015/16 the median full time equivalent salary was £29,345 and the ratio was 4.91:1).

## **Exit Packages**

Exit package cost band (including special payments)	Numb compu redund	ulsory			exit packages by		s in each	
	2015/16	2016/17	2015/16	2016/17	2015/16	2016/17	2015/16	2016/17

# Note 24 - External Audit Costs

The following fees are payable in relation to the audit of the Statement of Accounts, statutory inspections and other non-audit services provided by the Authority's external auditors:

2015/16		2016/17
£000		£000
	Fees payable to external auditors with regard to external audit services carried out by the appointed auditor for the year for:	
151	Financial Audit Work	59
16	Performance Audit Work	16
167	Total	75

The 2015/16 fees were based on estimates in the previous year and have been restated to reflect actual fees incurred. The figures for 2016/17 fees are estimated.

# Note 25 - Grant Income

# **Grant Income Credited to Taxation and non-specific Grant Income and Expenditure**

2015/16		2016/17
£000		£000
(160)	Capital Grants and Donations	(52)
(160)	Total	(52)

#### **Credited to Services**

2015/16		2016/17
£000		£000
	Welsh Government:	
(1,169)	Community Risk Reduction	(1,369)
(784)	New Dimensions and USAR Funding	(749)
(592)	Fire Link	(592)
(35)	JIGSO	0
(58)	Joint emergency Services Group	(110)
(30)	Other *	(54)
(2,668)	Total	(2,874)

<sup>\*</sup> Other Grants (external funding) comprise funding for small, non-recurring projects.

All grants, contributions and donations received have been recognised in the Comprehensive Income and Expenditure Statement as any attached conditions have been met. The grant figure includes grants received on behalf of South Wales Fire and Rescue Service and North

Wales Fire and Rescue Service. These grants are recorded as payments when transferred to the other Services. Mid and West Wales Fire Authority acted as banker for the three Services under this arrangement.

The Authority has received the following grants and donations that have yet to be recognised as income as they have conditions attached to them that will require the monies or property to be returned to the giver if the conditions are not satisfied. The balances at the year-end are as follows:

# **Current Liabilities Capital Receipts in Advance**

2015/16		2016/17
£000		£000
0	Water Rescue Grant	(236)
0	Donations	(10)
0	Total	(246)

# Note 26 - Related Parties

The Authority is required to disclose material transactions with related parties - bodies or individuals that have the potential to control or influence the Authority or to be controlled or influenced by the Authority. Disclosure of these transactions allows readers to assess the extent to which the Authority might have been constrained in its ability to bargain freely with the Related Party.

#### **Welsh Government**

Welsh Government has significant influence over the general operations of the Authority - it is responsible for providing the statutory framework within which the Authority operates and provides some funding in the form of grants. The grants received from government departments are set out in note 25.

#### **Members**

Members of the Fire and Rescue Authority have direct control over the Authority's financial and operating policies. The total of members' allowances paid in 2016/17 is shown in note 22.

#### Officers

No Officer declared a pecuniary interest in accordance with section 117 of the Local Government Act 1972.

#### Other Public Bodies

The Authority receives the majority of its revenue funding by charging a levy, based on population, to the six Unitary County Authorities in its area. Details of the amounts received by way of levy are shown within the narrative of the Statement of Accounts.

The Authority is the Administering Authority for the Firefighter Pension Fund. Details of the Firefighter Pension Fund are shown in note 30 and the Firefighter Pension accounts are on pages 66 to 69.

#### **Entities Influenced by the Authority**

Rescue 365 is a Community Interest Company Limited by Guarantee set up to provide prevention, protection and response services to the community in Mid and West Wales. Surpluses generated from the company's activities will be applied to provide prevention,

protection and response services to our communities. These prevention, protection and response services aim to complement the statutory and non-statutory prevention, protection and response services by Mid & West Wales Fire & Rescue Authority. The company directors have the ability to apply some or all of the surpluses in furtherance of Rescue 365's objectives and community purpose. As the community purpose is aligned with that of the Authority, the directors may pass some or all of the surpluses to the Authority.

A decision on how to use any surpluses would be a matter for the board of Rescue 365, who would need to act in the best interests of Rescue 365 with a view to furthering its community purpose. The Rescue 365 board included:

- a Councillor and member of the Authority;
- the Authority's Deputy Chief Fire Officer;
- · the Authority's Assistant Chief Fire Officer; and
- the Authority's Area Manager,

all of whom are likely to consider making grants of surpluses to the Authority or to Authority identified projects as being an effective way of furthering Rescue 365's community purpose and the intention at the outset was that surpluses would be applied to support services provided by the Authority.

In total the Authority has advanced £260k to Rescue 365 of which £209k is outstanding as at 31 March 2017 (£200k as at 31 March 2016). This figure has increased during the year as the loan agreement provided for a 5-year term with no repayments within the first year and interest of £20k was accrued during this period. Repayments commenced in January 2017.

In addition to the loan the Authority seconded staff and rented accommodation to Rescue 365 which was charged and the balance due at 31 March 2017 was £252k.

The total debtor in the Statement of Accounts for Rescue 365 is therefore £461k, effectively representing set-up costs. A review of the Accounts for Rescue 365 identified losses in the early years of trading, as a result of this the recoverability of the debt has been considered and it has been considered prudent to make a provision for bad debt of £356k. This has been charged in year to the net cost of services.

The Authority is working with Rescue 365 to determine the long-term viability of the company and is considering restructuring options and operating models.

Summary of Transactions between	Loan	Recharge	
Rescue 365 & MAWWFRS	Account	of Costs	Total

2016/17	(104)	(252)	(356)

# Note 27 - Capital Expenditure and Capital Financing

The total amount of capital expenditure incurred in the year is shown in the table below, together with the resources that have been used to finance it. Where capital expenditure is to be financed in future years by charges to revenue as assets are used by the Authority, the expenditure results in an increase in the Capital Financing Requirement (CFR), a measure of the capital expenditure incurred historically by the Authority that has yet to be financed. The CFR is analysed in the second part of this note.

2015/16 £000		2016/17 £000
21,831	Opening Capital Financing Requirement	22,467
	Capital Investment:	
3,449	Property Plant and Equipment	3,715
34	Intangible Assets	282
3,483	Total Capital Spending	3,997
	Sources of Finance:	
(590)	Capital receipts	(35)
(160)	Government Grants and other contributions/donations	(52)
	Sums set aside from revenue:	
0	Direct Revenue Contributions	(782)
(259) (766) 0 (1,072)	Minimum revenue provision: Option 1 – expenditure pre 31 March 2009 Option 3 – expenditure post 1 April 2009 Asset Life adjustment Finance Leases	(248) (711) 648 (1,188)
(2,847)	Total Sources of Finance	(2,368)
22,467	Closing Capital Financing Requirement	24,096
Explanation 2015/16	of movements in year	2016/17
£000		£000
636	Increase in underlying need to borrow (unsupported by government financial assistance)	1,629
636	Increase/(decrease) in Capital Financing Requirement	1,629

# Note 28 - Leases

# **Authority as Lessee - Finance Leases**

The Authority has acquired a number of vehicles under finance leases.

The assets acquired under these leases are carried as Property, Plant and Equipment in the Balance Sheet at the following net amounts:

31 March 2016		31 March 2017
£000		£000
0	Other Land and Buildings	0
6,156	Vehicles, Plant, Furniture, Equipment and Other	5,207
6,156	Total	5,207

The Authority is committed to making minimum payments under these leases comprising settlement of the long-term liability for the interest in the vehicle acquired by the Authority and finance costs that will be payable by the Authority in future years while the liability remains outstanding. The minimum lease payments are made up of the following amounts:

31 March 2016 £000	Finance lease liabilities (net present value of minimum lease payments):	31 March 2017 £000
998	- current	784
5,787	- non-current	4,819
1,220	Finance costs payable in future years	967
8,005	Minimum lease payments	6,570

The minimum lease payments will be payable over the following periods:

Minimum Leas	se Payments		Finance Lease Liabilities		
31 March 2016 £'000	31 March 2017 £'000		31 March 2016 £'000	31 March 2017 £'000	
1,241	978	Not later than one year	998	784	
3,474	2,795	Later than one year and not later than five years	2,868	2,300	
3,290	2,797	Later than five years	2,919	2,519	
8,005	6,570	Total	6,785	5,603	

# **Authority as Lessee - Operating Leases**

The Authority has acquired a number of light vehicles by entering into operating leases, with typical lives of 5 to 7 years.

The future minimum lease payments due under non-cancellable operating leases in future years are:

31 March 2016		31 March 2017
£000		£000
580	Not later than one year	550
1,623	Later than one year and not later than five years	1,073
0	Later than five years	0
2,203	Total	1,623

# **Note 29 - Termination Benefits**

The Authority terminated the contract of three employees through voluntary retirement / redundancy in 2016/17 incurring liabilities of £270k (£38k in 2015/16), see note 23 for the number of exit packages and total cost per band. This included two Control staff who took voluntary redundancy and the Director of Resources who left on early retirement.

# Note 30 - Defined Benefit Pension Scheme

# **Participation in Pension Schemes**

As part of the terms and conditions of employment of its officers, the Authority makes contributions towards the cost of post-employment benefits. Although these benefits will not actually be payable until employees retire, the Authority has a commitment to make the payments (for those benefits) and to disclose them at the time that the employees earn their future entitlement

The Local Government Pension Scheme (LGPS) pension scheme is operated under the regulatory framework for the Local Government Pension Scheme and the governance of the scheme is the responsibility of Dyfed Pension Fund, Carmarthenshire County Council. Policy is determined in accordance with the Pensions Fund Regulations. The investment managers of the fund are appointed by the pensions committee of Carmarthenshire County Council. The principal risks to the authority of the scheme are the longevity assumptions, statutory changes to the scheme, structural changes to the scheme (i.e. large-scale withdrawals from the scheme), changes to inflation, bond yields and the performance of the equity investments held by the scheme. These are mitigated to a certain extent by the statutory requirements to charge to the General Fund and the amounts required by statute as described in the accounting policies note. We recognise the cost of retirement benefits in the reported cost of services when they are earned by employees, rather than when the benefits are eventually paid as pensions.

However, the charge we are required to make against levy is based on the cash payable in the year, so the real cost of post-employment/retirement benefits is reversed out of the General Fund via the Movement in Reserves Statement. The following transactions have been made in the Comprehensive Income and Expenditure Statement and the General Fund Balance via the Movement in Reserves Statement during the year.

Discretionary post-retirement benefits on early retirement are an unfunded defined benefit arrangement, under which liabilities are recognised when awards are made. There are no plan assets built up to meet these pension liabilities.

The Firefighters Pension Scheme (FPS) is an unfunded defined benefit scheme meaning that no investments are held to fund the liabilities. Contributions, at a rate set by the Welsh Government, made by the employer and employees are held in a pension fund account, benefits paid are charged to the account with any balance on the account being received from, or paid to, the Welsh Government.

# **Basis for Estimating Assets and Liabilities**

2.2%

3.5%

Liabilities have been assessed on an actuarial basis using the projected unit credit method, an estimate of the pensions that will be payable in future years dependent on assumptions about mortality rates, salary levels, etc.

The Local Government Pension Scheme has been estimated by Mercer's an independent firm of actuaries and the Firefighters Pension Scheme has been valued by the Government Actuary's Department (GAD). Estimates for the Dyfed Pension Fund (the LGPS) are based on the latest full valuation of the scheme as at 1 April 2017.

# The significant assumptions used by the actuary have been:

2015/16	LGPS	2016/17
	Mortality assumptions	
	Longevity at retirement for current pensioners	
23.4	Men	22.8
25.9	Women	25.5
	Longevity at retirement for future pensioners	
25.7	Men	25.0
28.2	Women	27.8
	Other assumptions	
2%	Rate of inflation	2.3%
3.5%	Rate of increase in salaries	3.8%
2%	Rate of increase in pensions	2.3%
3.6%	Rate for discounting scheme liabilities	2.6%
2015/16	Firefighter Pension Scheme	2016/17

4.2%	Rate of increase in salaries	4.4%

Rate of increase in pensions

Rate for discounting scheme liabilities

2.4%

2.7%

The estimated weighted duration of the defined benefit obligation is 20 years for the Firefighter Scheme and 20 years for the Local Government Pension Scheme.

The estimation of the defined benefit obligations is sensitive to the actuarial assumptions set out in the table above. The sensitivity analyses below have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period and assumes for each change that the assumption analysed changes while all the other assumptions remain constant. The assumptions in longevity, for example, assume that life expectancy increases or decreases for men and women. In practice, this is unlikely to occur, and changes in some of the assumptions may be interrelated. The estimations in the sensitivity analysis have followed the accounting policies for the scheme, i.e. on an actuarial basis using the projected unit credit method. The methods and types of assumptions used in preparing the sensitivity analysis below did not change from those used in the previous period.

## Impact of assumptions on the obligation – LGPS

	As Reported	Discount Rate 0.1% Increase	Inflation 0.1% Increase	Pay Growth 0.1% Increase	Life Expectancy 1-year Increase
	£000	£000	£000	£000	£000
Liabilities	(57,974)	(56,816)	(59,154)	(58,296)	(59,094)
Assets	45,084	45,084	45,084	45,084	45,084
(Deficit) / Surplus	(12,890)	(11,732)	(14,070)	(13,212)	(14,010)
Projected Service Cost for Next Year	1,835	1,777	1,894	1,835	1,873
Projected Net Interest Cost for Next Year	323	305	355	332	353

# Impact of assumptions on the obligation - Firefighter Pension Scheme

	£000	£000	£000	£000	£000	£000	
FFPS	(461,880)	(504,480)	(467,180)	(474,580)	(501,780)	(462,180)	

# Impact on the Authority's Cash Flows

We recognise the cost of retirement benefits in the reported cost of services when they are earned by employees, rather than when the benefits are eventually paid as pensions. However, the charge we are required to make against the levy is based on the cash payable in the year, so the real cost of post-employment/retirement benefits is reversed out of the General Fund via the Movement in Reserves Statement. The transactions in the preceding table have been made in the Comprehensive Income and Expenditure Statement and the General Fund Balance via the Movement in Reserves Statement during the year.

The table above shows the amount included in the Balance Sheet arising from the authority's obligation in respect of its defined benefit plans.

# Note 31 Nature & Extent of Risks arising from Financial Instruments

The Authority's activities expose it to a variety of financial risks:

- Credit risk the possibility that other parties might fail to pay amounts due to the Authority
- Liquidity risk the possibility that the Authority might not have funds available to meet its commitments to make payments.
- Market risk the possibility that financial loss might arise for the Authority as a result of changes in such measures as interest rates and stock market movement.

The Authority's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the resources available to fund services. Financial risk management is carried out under policies approved by the Authority in the Annual Treasury Management Strategy. The Authority provides written principles to overall risk management, as well as written guidance covering specific areas, such as interest rate risk, credit risk and the investment of surplus cash.

#### **Credit Risk**

Credit risk arises from deposits with banks and financial institutions, the value of credit exposure to the Authority's customers is low and considered not to pose a risk.

This risk is minimised through the Annual Investment strategy, which requires that deposits are not made with financial institutions unless they meet identified minimum credit criteria. The amounts invested are restricted to prudent and affordable amounts as set out in the approved strategy.

The current strategy is to invest internally as far as possible, thus reducing the need to borrow and reducing the cash surplus available for investment and the period those surpluses are available.

The Authority's maximum exposure to credit risk is in relation to its investments with its bank. Recent experience has shown that it is rare for such entities to be unable to meet their commitments. A risk of non-recovery applies to all of the Authority's deposits, but there was no evidence at the 31 March 2017 that this was likely to crystallise.

#### **Liquidity Risk**

The Authority monitors its cash balance to ensure that cash is available as needed. If unexpected movements happen, the Authority has ready access to borrowings from the UK Debt Management Office. There is no significant risk that it will be unable to raise finance to meet its commitments under financial instruments. Instead, the risk is that the Authority will be bound to replenish a significant proportion of its borrowings at a time of unfavourable interest rates. The strategy is to ensure that loans mature within the approved limits shown in the table below through a combination of careful planning of new loans taken out and (where it is economic to do so) making early repayments. The maturity analysis of financial liabilities is as follows:

	Approved minimum limits	Approved maximum limits	Actual 31 March 2016	31 March 2016	Actual 31 March 2017	31 March 2017
			£000		£000	
Less than 1 year	0%	20%	4,280	20%	382	2%
Between 1 and 2 years	0%	20%	280	1%	470	3%
Between 2 and 5 years	0%	50%	2,020	10%	1,786	10%
Between 5 and 10 years	0%	75%	3,005	14%	2,808	17%
More than 10 years	25%	90%	11,465	55%	11,465	68%
Total			21,050	100%	16,911	100%

#### **Market Risk**

#### Interest Rate Risk

The Authority is exposed to risk in terms of its exposure to interest rate movements on its borrowings and investments. Movements in interest rates have a complex impact on the Authority. For instance, a rise in interest rates would have the following effects:

- Borrowings at fixed rates the fair value of the liabilities borrowings will fall
- Borrowings at variable rates the interest expense charged to the Surplus or Deficit on the Provision of Services will rise
- Investments at variable rates the interest income credited to the Surplus or Deficit on the Provision of Service will rise
- Investments at fixed rates the fair value of the assets will fall.

Because of the Authority's borrowing and surplus cash levels, with the limited period surpluses are held, borrowing and investment opportunities are limited. Borrowing is mainly at fixed interest rates and investments are at variable interest rates.

Borrowings are not carried at fair value, so nominal gains and losses on fixed rate borrowings would not impact on the Surplus or Deficit on the Provision of Services or Other Comprehensive Income and Expenditure. However, changes in interest receivable on variable rate investments will be posted to the surplus or Deficit on the Provision of Services and affect the General Fund Balance.

#### Price Risk

The Authority does not invest in equity shares and has no exposure to price risk.

#### Foreign Exchange Risk

The Authority has no financial assets or liabilities denominated in foreign currencies and thus has no exposure to loss arising from movements in exchange rates.

# **Note 32 Contingent Liability**

In October 2018 the Pensions Ombudsman determination was received in respect of 2 complaints lodged in 2016. The complaints were in relation to the treatment of allowances operating within the Service, and whether or not such allowances should be pensionable. Whilst the complaints relate to 2 employees, the impact covered all employees working and receiving those allowances.

The Pensions Ombudsman determined that 2 out of 4 allowances were pensionable and 2 were not. Since the Determination, the Service has lodged an Appeal to the High Court against the Ombudsman's Determination and included an application to stay the Ombudsman's directions. The Trade Union has also lodged an Appeal. Until the Appeals are concluded is it not possible to reliably measure any potential obligation or even to know whether an outflow of resources will be required.

\* On 31 December 2016 the Pensions 'contribution holiday' provision came into force. Under the previous terms of the 1992 scheme, firefighters who were members of that scheme were obliged to pay pension contributions until they reached the age of 50. However, their pensions could only reflect a maximum of 30 years' service. Those who joined the Fire Service between the ages of 18 and 20 and accrued 30 years pensionable service still had to continue paying contributions until they reached 50, even though they could not accrue any further pension benefits in return.

The 'Firefighters Pensions (Wales) Scheme (Amendment and Transitional Provisions) Order 2016' has amended the 1992 scheme by implementing an employee Pension 'contribution holiday' for scheme members who accrued the maximum 30 years' pensionable service prior to age 50. This applies from the point of accruing maximum pensionable service in the scheme until the member's 50th birthday. No employee contributions were to be made during this period and any such contributions already made after 1 December 2006 must be refunded with interest. The cost of doing so has been met by Welsh Government and is included in 'Other Payments' in the Benefits Payable by the fund above. Funding from Welsh Government in relation to this 'contribution holiday' provision was received in year, separate to the Pension 'top up ' grant.

#### NOTES TO THE FIREFIGHTERS PENSION FUND ACCOUNT

The Fund was established 1 April 2007 and covers the 1992, 2006, 2015 and the Modified Firefighters' Pension Schemes and is administered by the Authority. Employee and employer contributions are paid into the Fund, from which payments to pensioners are made. Employees' and employer's contribution levels are based on percentages of pensionable pay set nationally by Welsh Government and subject to triennial revaluations by the Government Actuary's Department (GAD). The scheme is an unfunded scheme with no investment assets and any difference between benefits payable and contributions receivable is met by Top Up Grants from the Welsh Government (WG).

Transfers in to the scheme are a transfer of pension benefits from another pension scheme for new or existing employees and transfers out are transfer benefits for employees who have left the Authority and joined another pension scheme.

The Authority is responsible for paying the employer's contributions in to the fund and these are the costs that are identified in the accounts for the Authority.

At the beginning of the financial year an assessment is made of the amount of Top Up Grant required from Welsh Government and 80% of the estimate is paid in July. The 2016/17 estimate included an assessment of the number of firefighters due to retire within the year based on age and years' service, from this an estimate can then be made of the commutation payments that would fall due and the additional pension payments.

The accounting policies adopted for the production of the Pensions Fund Account are in line with recommended practice and follow those that apply to the Authority's primary statements.

Following the successful conclusion of the court case (GAD v Milne) in relation to the actuarial calculation used for commutation payments due to retiring firefighters dating back a number of years, during 2015/16 £1.590 million was paid to those pensioners that were affected and HM Treasury settled the tax liability due on the payments on behalf of the fund. During 2016/17 an additional £30k was paid out to pensioners affected.

# Additional Note to the Firefighters' Pension Fund Account

The Firefighters' Pension (Wales) Scheme (Amendment) Order 2014 came into force on 31 December 2014 with an effective date of 1 July 2013. The Order included an amendment to the pension regulations which introduced new powers for the Authority to make certain temporary allowances and emoluments pensionable under an Additional Pension Benefit (APB) arrangement. During November 2017 it became apparent that Welsh Fire and Rescue Services had not implemented the Order and temporary allowances had been treated in accordance with previous regulations. On 11 December 2017 the Authority approved a report to implement the requirements of the Order, consultation is ongoing with the appropriate representative bodies on the proposed implementation date and retrospective application of the policy where appropriate. As a consequence of the delays in implementing the Order a small number of retirees have received pension settlements which are not in accordance with the relevant regulations. Whilst the Authority is satisfied that the amounts are not material, work is currently in progress to address any residual issues around the legality and funding of these payments and to agree any remedial actions necessary.

#### **Contribution Rates**

Under the Firefighters' Pension Regulations, the employer's contribution rate for the 2015 scheme was 14.3% of pensionable pay with employee's rates as per the pensionable pay banding detailed below:

Pensionable Pay Band	2016/17 Contribution Rate %
Up to and including £27,270	10.0
More than £27,271 and up to and including £50,500	12.5
More than £50,501 and up to and including £142,500	13.5
More than £142,500	14.5

For the 2006 scheme the employer's contribution was 16.8% of pensionable pay with employee's rates as per the pensionable pay banding detailed below:

Pensionable Pay Band	2016/17 Contribution Rate %
Up to and including £15,301	8.5
More than £15,302 and up to and including £21,422	9.4
More than £21,423 and up to and including £30,603	10.4
More than £30,604 and up to and including £40,804	10.9
More than £40,805 and up to and including £51,005	11.2
More than £51,006 and up to and including £61,206	11.3
More than £61,207 and up to and including £102,010	11.7
More than £102,011 and up to and including £122,412	12.1
More than £122,412	12.5

For the 1992 and Modified schemes the employer's contribution rate was 25.5% of pensionable pay with employee's rates as per the pensionable pay bandings detailed below:

Pensionable Pay Band	2016/17 Contribution Rate %
Up to and including £15,301	11.0
More than £15,302 and up to and including £21,422	12.2
More than £21,423 and up to and including £30,603	14.2
More than £30,604 and up to and including £40,804	14.7
More than £40,805 and up to and including £51,005	15.2
More than £51,006 and up to and including £61,206	15.5
More than £61,207 and up to and including £102,010	16.0
More than £102,011 and up to and including £122,412	16.5
More than £122,412	17.0

The Firefighters' Pension Fund Account does not take account of liabilities for pensions and other benefits after the period end as this is the responsibility of the Authority. Details of the long-term pension obligations can be found in Note 30 to the core financial statements (£461.880m at 31 March 2017 and £382.550m at 31 March 2016).

# Glossary of Terms used in the Statement of Accounts

#### **ACCOUNTING PERIOD**

The period of time covered by the accounts, normally a period of twelve months commencing on 1 April. The end of the accounting period is the Balance Sheet date.

#### **ACCOUNTING POLICIES**

These specify policies and procedures used by the Authority to prepare its Financial Statements, including methods, measurement systems and procedures for presenting disclosures.

#### **ACCRUALS**

Sums included in the final accounts to recognise revenue and capital income and expenditure earned or incurred in the financial year, but for which actual payment had not been received or made as at 31 March.

#### **ACTUARIAL GAINS AND LOSSES**

For a defined benefit pension scheme, the changes in actuarial surpluses or deficits that arise because:

- Events have not coincided with the actuarial assumptions made for the last valuation (experience gains and losses); or
- The actuarial assumptions have changed

#### **ASSET**

An item having value to the Authority in monetary terms. Assets are categorised as either current or non-current:

- A current asset will be consumed or cease to have material value within the next financial year (e.g. cash and stock);
- A non-current asset provides benefits to the Authority and to the services it provides for a
  period of more than one year and may be tangible e.g. a fire station, or intangible, e.g.
  computer software licences.

#### **AUDIT OF ACCOUNTS**

An independent examination of the Authority's financial affairs.

# **BALANCE SHEET**

A statement of the recorded assets, liabilities and other balances at the end of the accounting period.

#### **BORROWING**

Using cash provided by another party to pay for expenditure, on the basis of an agreement to repay the cash at a future point, usually incurring additional interest charges over and above the original amount.

#### **BUDGET**

The forecast of net revenue and capital expenditure over the accounting period.

#### **CAPITAL EXPENDITURE**

Expenditure on the acquisition of a non-current asset, which will be used in providing services beyond the current accounting period, or expenditure which adds to and not merely maintains the value of an existing non-current asset.

#### **CAPITAL FINANCING**

Funds raised to pay for capital expenditure. There are various methods of financing capital expenditure including borrowing, leasing, direct revenue financing, usable capital receipts, capital grants, capital contributions, revenue reserves and earmarked reserves.

#### **CAPITAL PROGRAMME**

The capital schemes the Authority intends to carry out over a specific period of time.

#### **CAPITAL RECEIPT**

The proceeds from the disposal of land or other non-current assets. Proportions of capital receipts can be used to finance new capital expenditure, within rules set down by the government but they cannot be used to finance revenue expenditure.

#### **CIPFA**

The Chartered Institute of Public Finance and Accountancy.

#### COMPREHENSIVE INCOME AND EXPENDITURE STATEMENT

The account of the Authority that reports the net cost for the year of the functions for which it is responsible and demonstrates how that cost has been financed from precepts, grants and other income.

#### **CONTINGENT ASSET**

A contingent asset is a possible asset arising from past events whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the Authority's control.

#### **CONTINGENT LIABILITY**

A contingent liability is either:

- A possible obligation arising from past events whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the Authority's control; or
- A present obligation arising from past events where it is not probable that a transfer of economic benefits will be required, or the amount of the obligation cannot be measured with sufficient reliability.

#### **CREDITOR**

Amount owed by the Authority for work done, goods received or services rendered within the accounting period, but for which payment has not been made by the end of that accounting period.

# **CURRENT SERVICE COST (PENSIONS)**

The increase in the present value of a defined benefits pension scheme's liabilities, expected to arise from employee service in the current period.

# **DEBTOR**

Amount owed to the Authority for works done, goods received or services rendered within the accounting period, but for which payment has not been received by the end of that accounting period.

#### **DEFINED BENEFIT PENSION SCHEME**

Pension schemes in which the benefits received by the participants are independent of the contributions paid and are not directly related to the investments of the scheme.

#### **DEPRECIATION**

The measure of the cost of wearing out, consumption or other reduction in the useful economic life of the Authority's non-current assets during the accounting period, whether from use, the passage of time or obsolescence through technical or other changes.

#### **DISCRETIONARY BENEFITS (PENSIONS)**

Retirement benefits, which the employer has no legal, contractual or constructive obligation to award and are awarded under the Authority's discretionary powers such as the Local Government (Discretionary Payments) Regulations 1996.

#### **EQUITY**

The Authority's value of total assets less total liabilities.

#### **EVENTS AFTER THE BALANCE SHEET DATE**

Events after the Balance Sheet date are those events, favourable or unfavourable, that occur between the Balance Sheet date and the date when the Statement of Accounts is authorised for issue.

#### **EXPECTED RETURN ON PENSION ASSETS**

For a funded defined benefit scheme, this is the average rate of return, including both income and changes in fair value but net of scheme expenses, which is expected over the remaining life of the related obligation on the actual assets held by the scheme.

#### **FAIR VALUE**

The fair value of an asset is the price at which it could be exchanged in an arm's length transaction.

#### **FINANCE LEASE**

A lease that transfers substantially all of the risks and rewards of ownership of a non-current asset to the lessee.

#### **GOVERNMENT GRANTS**

Grants made by the government towards either revenue or capital expenditure in return for past or future compliance with certain conditions relating to the activities of the Authority. These grants may be specific to a particular scheme or may support the revenue spend of the Authority in general.

#### **IMPAIRMENT**

A reduction in the value of a non-current asset to below its recoverable amount, the higher of the asset's fair value less costs to sell and its value in use.

## **INFRASTRUCTURE ASSETS**

Non-current assets belonging to the Authority that cannot be transferred or sold, on which expenditure is only recoverable by the continued use of the asset created. Examples are hydrants.

# **INTANGIBLE ASSETS**

An intangible (non-physical) item may be defined as an asset when access to the future economic benefits it represents is controlled by the reporting entity. This Authority's intangible assets comprise computer software licences.

# **INTEREST COST (PENSIONS)**

For a defined benefit scheme, the expected increase during the period of the present value of the scheme liabilities because the benefits are one period closer to settlement.

# **INVESTMENTS (PENSION FUND)**

The investments of the Pension Fund will be accounted for in the statements of that fund. However, authorities are also required to disclose, as part of the disclosure requirements relating to retirement benefits, the attributable share of the pension scheme assets associated with their underlying obligations.

#### LIABILITY

A liability is where the Authority owes payment to an individual or another organisation.

- A current liability is an amount which will become payable or could be called in within the next accounting period, e.g. creditors or cash overdrawn.
- A deferred liability is an amount which by arrangement is payable beyond the next year at some point in the future or to be paid off by an annual sum over a period of time.

#### **LONG-TERM CONTRACT**

A contract entered into for the design, manufacture or construction of a single substantial asset or the provision of a service (or a combination of assets or services which together constitute a single project), where the time taken to substantially complete the contract is such that the contract activity falls into more than one accounting period.

#### **MINIMUM REVENUE PROVISION (MRP)**

The minimum amount which must be charged to the revenue account each year in order to provide for the repayment of loans and other amounts borrowed by the Authority.

#### **NET BOOK VALUE**

The amount at which non-current assets are included in the Balance Sheet, i.e. their historical costs or current value less the cumulative amounts provided for depreciation.

#### **OPERATING LEASE**

A lease where the ownership of the non-current asset remains with the lessor.

#### **OPERATIONAL ASSETS**

Non-current assets held and occupied, used or consumed by the Authority in the pursuit of its strategy and in the direct delivery of those services for which it has either a statutory or discretionary responsibility.

#### PAST SERVICE COST (PENSIONS)

For a defined benefit pension scheme, the increase in the present value of the scheme liabilities related to employee service in prior periods arising in the current period as a result of the introduction of, or improvement to retirement benefits.

#### **PENSION SCHEME LIABILITIES**

The liabilities of a defined benefit pension scheme for outgoings due after the valuation date. Scheme liabilities measured using the projected unit method reflect the benefits that the employer is committed to provide for service up to the valuation date.

# **PRIOR YEAR ADJUSTMENT**

Material adjustments applicable to previous years arising from changes in accounting policies or from the correction of fundamental errors. This does not include normal recurring corrections or adjustments of accounting estimates made in prior years.

## **PROVISION**

An amount put aside in the accounts for future liabilities or losses which are certain or very likely to occur but the amounts or dates of when they will arise are uncertain.

#### **PUBLIC WORKS LOAN BOARD (PWLB)**

A Central Government Agency, which provides loans for one year and above to authorities at interest rates only slightly higher than those at which the government can borrow itself.

#### **RELATED PARTIES**

There is a detailed definition of related parties in FRS 8. For the Authority's purposes related parties are deemed to include the Authority's members, the Chief Executive, its Directors and their close family and household members.

#### **RELATED PARTY TRANSACTIONS**

The Statement of Recommended Practice requires the disclosure of any material transactions between the Authority and related parties to ensure that stakeholders are aware when these transactions occur and the amount and implications of such.

#### REMUNERATION

All sums paid to or receivable by an employee and sums due by way of expenses allowances (as far as those sums are chargeable to UK income tax) and the money value of any other benefits. Received other than in cash. Pension contributions payable by the employer are excluded.

#### **RESERVES**

The accumulation of surpluses, deficits and appropriations over past years. Reserves of a revenue nature are available and can be spent or earmarked at the discretion of the Authority. Some capital reserves such as the Capital Adjustment account cannot be used to meet current expenditure.

#### **RETIREMENT BENEFITS**

All forms of consideration given by an employer in exchange for services rendered by employees that are payable after the completion of employment.

#### REVENUE EXPENDITURE

The day-to-day expenses of providing services.

# **USEFUL ECONOMIC LIFE (UEL)**

The period over which the Authority will derive benefits from the use of a non-current asset.
